Don't just
make a living

Make a difference

Surprise yourself at Philips

It all started when Frederik and Gerald Philips opened a small factory in Eindhoven to manufacture light bulbs. Since then we've grown into a leading, global health technology company with 80,000+ employees, whose ambition is to improve the lives of 3 billion people, every year, by 2025. We could never have predicted over a century ago that we'd be where we are today. But that's the beauty of the unexpected. Plenty of people surprise themselves when they work with us. Will you?
